Graduate

Hyderabad, Telangana, India

Summary

I am a 3rd-year Computer Science Engineering student aspiring to become an AI Product Engineer, focused on building practical, scalable AI solutions.

My core interests lie in:

- Artificial Intelligence & Machine Learning
- Data Analysis & Real-world AI applications
- Product-driven engineering and system thinking

I am actively strengthening my foundation in Python, machine learning, and software development through hands-on projects, structured learning, and continuous experimentation with AI technologies.

I enjoy working at the intersection of technology and product — translating ideas into efficient, measurable solutions rather than just writing code.

Currently seeking opportunities as an AI Intern / ML Intern where I can learn, build, and contribute to impactful AI-driven products.

Education

Sphoorthy Engineering College

Bachelor of Technology - BTech, Computer Science · (August 2023 - April 2027)
